MAT 117: College Algebra

Overview

This online college algebra course equips you with the skills to effectively solve problems using algebraic reasoning. What sets this course apart from a standard algebra course is its strong emphasis on the techniques that are used to solve problems. Throughout this course, you will be able to participate in discussions with other students and the professor to help build your conceptual understanding of algebra. In this course, you will learn about systems of linear equations, rational functions, quadratic functions, logarithmic functions, general polynomial functions, and exponential functions.

What You’ll Learn

- How to apply algebraic reasoning to solve a range of problems
- How to identify functions, domains, ranges, intercepts and other critical algebraic concepts
- Skills required for success in future studies in calculus

How to Succeed

To be successful in this course, we recommend English language fluency and computer literacy. We also encourage you to make sure your laptop or desktop computer meets the technical requirements.

Earn College Credit

This course appears on your transcript identically to how it appears on the transcript of an enrolled ASU student.

This course satisfies 3 credit hours toward the Mathematics (MA) General Studies requirement at Arizona State University. It is strongly encouraged that you consult with your institution of choice to determine how these credits will be applied.

In order to receive academic credit for this course, you must earn a grade of "C" or better. You have one year to add the course to your transcript.

Exams and Grading

- 40% Unit Quizzes
- 20% Midterm Exam
- 40% Final Exam

ASU Universal Learner Courses
Arizona State University
MAT 117: Continued

Course Structure
MAT 117 is an adaptive class run in ALEKS (Assessment and Learning in Knowledge Spaces). ALEKS uses adaptive questioning in the form of an Initial Knowledge Check (IKC) to determine exactly what a student knows and doesn’t know upon entry into the course. ALEKS then instructs the student on the topics they are most ready to learn. As a student works through the course, ALEKS periodically reassesses the student to ensure that topics learned are also retained. This is done through Progress Knowledge Checks and Post Objective Knowledge Checks. By the end of the session, the student will have learned 307 topics across four units.

Course Communication
All communication will take place via the discussion forums and course announcement page. There will be a discussion forum where you can post general questions, comments, and direct inquiries for the instructor and course team. Please use these forums to ensure a timely response. Your instructor will not be able to respond to email.

Graded Assignments
Graded assignments are required and count towards your final grade. Students must submit all assignments via the course site unless otherwise instructed.

Materials
This course makes use of open educational resources (OERs) provided within the course, no purchase necessary. A handheld graphing calculator (such as the TI-83/84) is recommended and may be used on any exam in the class. If you would like to use an online calculator, these two are approved for use in exams:
- [https://calculatorpi.com/](https://calculatorpi.com/)

Additional Information
If you have questions about Universal Learner Courses and how they work, please visit [ea.asu.edu](http://ea.asu.edu) or contact our support team at ulcourses@asu.edu.

Instructor led Version
Instructor led courses have a structure with due dates that guide students to complete the course within 16 weeks. Instructor led courses are great for:
- Students who prefer a structured timeline with established due dates for assignments
- Students who enjoy interaction with other students, who will be completing assignments at the same time
- Students who are taking their first course online and may benefit from greater guidance

Assignment Deadlines
Your instructional team will provide all content and learning activities on or through your course site. It is your responsibility to review all content, fulfill all assignments on time, and ask any questions you have in the designated discussion area. It is also your responsibility to determine the due dates and times for all course assignments according to your time zone. Due to the large-scale format of Universal Learner Courses, late assignments will not be accepted at any point during the course, and we cannot make exceptions.
Instructor led Cont.

Time Commitment
This is an asynchronous, online course. This means, while you will have deadlines, you do not need to be at your computer at specific times or participate in live activities.

To be successful in this class, you must view all course pages and complete all graded work by the deadlines indicated. Also, keep in mind that “attendance” in an online course means logging into the platform on a regular basis, checking for course announcements, and visiting and participating in the discussion forums.

This 3 credit, 16 week course requires about 135 hours of work. Therefore, expect to spend approximately 8-10 hours per week preparing for and engaging in this course.

Self paced Version
Self paced courses allow students to complete course assignments at their own pace, as long as the course is completed within a year. Self paced courses are great for:
- Students who want to start right away
- Students who are self-directed and can set and stick to a plan for completing the course
- Students who may want to either go faster or slower than the instructor led version

Time Commitment
The work in this course is equivalent to an eight week course but you have one year to complete it. Please plan your goals accordingly. During this year, you are encouraged to work through the course at a pace that suits your needs.

You have one year from the date you enrolled to complete the course, and you have one year from the date you complete the course to purchase your academic credit.

Course Resets
Self paced courses cannot be reset. If you are not happy with your grade and want to take the course again, you have two options: you may take the course the next time it is offered in an instructor led format or wait until a new version of the self paced course opens at the beginning of every academic year on the first day of class in August.

Transcript
You will be able to add the course to your transcript six weeks after enrolling. Although the course is self paced, course attendance dates will be listed on your transcript. After purchasing the credits, the course will appear on your transcript in the session you completed the course. If you are on the cusp of two sessions and need to confirm the date of completion or beginning/end of a session, please contact our support team at ulcourses@asu.edu.
